## HQLM-3125X 31-inch 4K/HD Multi-format LCD Master Monitor

HDMI™ 4K HDR

NEW

The HQLM-3125X employs an LED-backlight 4096x2160 pixel 10-bit resolution UHD LCD panel with a contrast ratio of 1,000,000:1. 3G-SDI, HD-SDI and HDMI inputs are available as standard features. When it comes to 3G-SDIx4, square-division and two-sample interleave are available. For other 4K equipment, a dual-channel 12G-SDI input is also available. HQLM-3125X can also display test signals such as video waveform and display vertical interval time code. Additional broadcast related functions include an 8-channel embedded audio and closed caption displays.

## Evolutionary Features for HQLM Series

### HDR High Dynamic Range

HDR

The HDR will comply with Hybrid Log-Gamma (HLG) and SMPTE ST 2084(PQ), among others, using direct backlight (brightness 1,000cd/m<sup>2</sup>). These features comply with the ITU-R BT.2020 and BT.2100 HDR standards. The HQLM-3125X provides a wide-color gamut corresponding to the ITU-R BT.2020 standard. Support for ITU-R BT.709/ DCI-P3 D65/ DCI-P3/ ACES/ Adobe RGB standards is also available.

## HQLM-3120W 31-inch 4K/HD Multi-format LCD Monitor

**HDMI™ 4K HDR**

The HQLM-3120W is equipped with 2 channels of 12G-SDI input as standard for efficient configuration with 4K equipment such as cameras and switchers. In addition, this monitor includes 3G-SDI, HD-SDI and HDMI inputs as standard. It has the flexibility to work with various interfaces in the image production field. By employing a 31.1-inch 4096x2160 pixel UHD LCD panel using LED backlight, it can reproduce high resolution 4K and 2K images.

## HLM-2460W 24-inch HDTV/SDTV Full HD Pixel Multi-format LCD Color Monitor

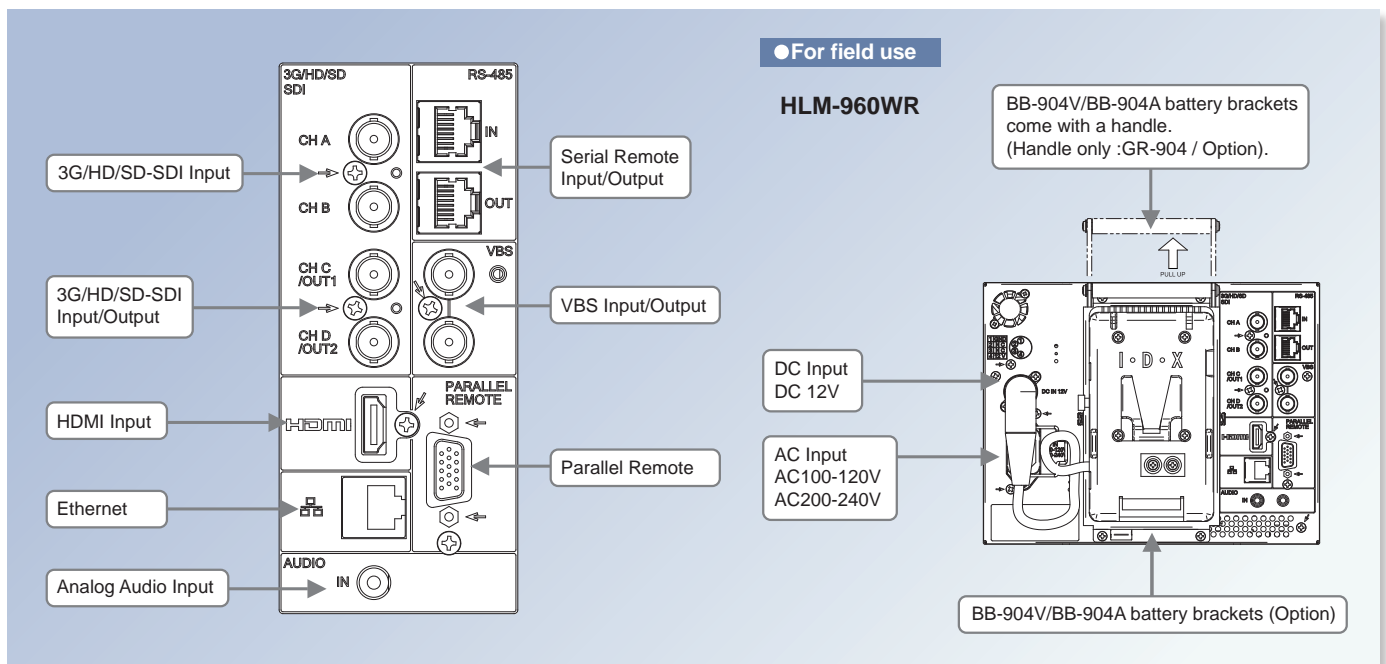

**HDMI™ HDR**

The HLM-2460W has a 24-inch Full HD 1920x1200 Pixel 400cd/m<sup>2</sup>, 10-bit resolution LCD panel. This model offers very narrow front-to-back dimensions, light weight and low power consumption. Multi-format SDI, 3G-SDI, HDMI and VBS inputs are provided as standard. By employing a Full 1920x1200 pixel LCD panel which has wide viewing angle, high brightness, high contrast, fast motion response, and high quality colour reproduction, the HLM-2460W achieves real pixel allocation without resizing. Its superb gradation characteristics also make it ideal for a wide range of broadcast applications, including use in monitor walls.

## HLM-960WR 9-inch HDTV/SDTV Full HD Pixel Multi-format LCD Color Monitor

**HDMI™ HDR**

The HLM-960WR is a highly compact multi-format LCD monitor with a 9-inch Full HD 1920×1080 pixel 400cd/m<sup>2</sup> 8-bit resolution LCD panel. This model offers very narrow front-to-back dimensions, light weight and low power consumption. Multi-format SDI, 3G-SDI, HDMI and VBS inputs are provided as standard. The HLM-960WR is low in power consumption, supporting either AC or DC powering. Battery operation is available using an optional battery bracket. The monitor has a USB connector on the operation panel, allowing setup file store & recall, as well as, remote operation from a mouse for menu navigation, including user maker operation, etc.

## Common features for HLM 60 series

### High Dynamic Range (Factory Option)

The 60 series monitors support HDR (High Dynamic Range) EOTF tables of HLG1, HLG2, and S-Log3 as an option in addition to conventional gamma.

SDR picture

HDR picture

### 2 Split-Screen Display

Captured image and live video can be displayed simultaneously on the same screen. Display mode can be selected from side by side, picture in picture, horizontal wipe, and vertical wipe. This function is convenient for adjusting colors and position of multiple cameras. Two live signals also can be displayed.

2-Split-Screen Display

### MIX TEST SIGNAL Function

It is possible to mix the live picture with a reference TEST signal generated by the monitor. This provides a good reference for black and white levels which could otherwise be difficult to confirm with certainty due to the front panel adjustment of Contrast and Brightness. Regarding the peak level of the input signal, users can confirm an overload with the Alarm LED (OVER RANGE) on the Front panel.

-2%, 0%, +2% of pluge signals are embedded.

0%  
-2% +2%

100 to 109% of brightness signal is embedded.

100% 109%

### Zoom Display Function

This function is to enable 2X/4X magnification without scaling of the image. It is useful to confirm errors in the signal, such as dead pixels of a CCD camera and to check in the detailed sections of the picture.

### Use Marker Function (Patent Pending)

#### 10 different Scene files for User Markers

It is possible to create User Marker displays, up to 10 scenes. Each scene can be set in real time by users with the "FUNCTION" switch on the front panel.

#### Easy Drawing with USB Mouse

Marker drawing with a USB mouse is possible. For precise adjustment, it is possible to adjust down to 1 pixel out of 1920x1080 pixels. Also, numerical management is provided with XY coordinate data. In addition, by saving the files to USB memory, the marker data can be copied to another identical model.

### Full Screen Capture Function

By capturing a full screen (1920x1080), it is possible to compare a live image with a captured still image. Switching between live and still can be done manually or automatically. By copying a captured image to USB memory, users can set the same viewing angle as in the prior shot referring to the captured still image.

#### Manual Switching

By capturing the image of one of two cameras, it allows users to switch and compare a captured still image with the live image of the other camera. Even if the two video images are not synchronized, switching of images can be done smoothly without any shock. It is useful for luminance or color tone adjustment.

#### Auto Switching

The time interval of auto switching can be changed per frame (1/2/3/5/10/30 frame). By storing the captured still images in USB memory, and then downloading the image, users can set the same viewing angle and same color as in the prior shot. It can be helpful for "frame-by-frame" shooting.

## HLM-5013WR 5-inch Triple Multi-Format LCD Monitor

High-End Broadcast LCD Monitor

Ikegami introduces a triple 5 inch high performance, rack mount ready, professional broadcast monitor that features 2 channels of SD-SDI/HD-SDI/3G-SDI Multi-Format Signal Inputs, 800X480 with LED Back Light panel resolution, Title Generator, Embedded Audio Level Indicators up to 16ch, Waveform Display, Vector Scope and many of the other advantages as higher level broadcast display offerings.
